PROFESSIONAL SUMMARY

I build things for the web that look great and feel right to use. With 2+ years working across front-end development and UI/UX design, I sit comfortably in the space where design meets code - which means I catch problems early, collaborate better, and deliver work I'm actually proud of.

My toolkit includes React, Node.js, MongoDB, Figma, and the Adobe suite. I care about the details: clean components, consistent design, and interfaces that don't make people think twice.

I'm also someone who's genuinely curious - always picking up something new, whether it's a better way to structure a component, a sharper design pattern, or a tool that changes how I work. That drive to keep learning is just part of how I operate.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Responsive Design

Back-End / Full-Stack: Node.js, MongoDB, Strapi CMS, REST APIs, MERN Stack

Design Tools: Figma, Adobe Photoshop, Adobe Illustrator, Adobe Dreamweaver, Canva, InDesign

Developer Tools: Git, GitHub, GitLab, VS Code

Languages: English, Malayalam, Tamil, Hindi

PROFESSIONAL EXPERIENCE

Front-End Developer & UI/UX Designer | Febno Technologies | Dec 2025 - Present

- ▶ Build and ship web apps with the dev team using React.js and Strapi CMS - I write reusable components so the same problem only gets solved once.
- ▶ Turn Figma designs into responsive, cross-browser pages - I'm the person who makes sure the final build actually looks like what was designed.
- ▶ Design posters, digital assets, and brand visuals in Photoshop and Illustrator that go out across all marketing channels.
- ▶ Regularly audit existing website sections - catch UI inconsistencies, fix them, and leave things better than I found them.

Front-End Developer & Branding Designer | The Chandraz | Jun 2024 - Dec 2025

- ▶ Combed through the entire website and fixed broken links, layout bugs, and outdated content across 10+ pages - HTML, CSS, and JavaScript.
- ▶ Added new features and visual improvements that made the site sharper - better UX, stronger brand presence.
- ▶ Built the brand's visual identity from scratch - colour palette, typography, and asset guidelines that are now used consistently across all their marketing.

EDUCATION & CERTIFICATIONS

MERN Stack Development | Boot Camp | 2022 - 2023

Hands-on bootcamp where I built real apps using JavaScript, React, Node.js, and MongoDB. Less theory, more delivering.

Bachelor of Multimedia | University of Calicut | 2019 - 2022

Three years studying multimedia design, digital production, and creative software. This is where the design instinct behind my dev work comes from.

PROJECTS

Soorya Bhavanam | HTML5, CSS3, JavaScript, Bootstrap | [Website Link](#)

Designed the UI in Figma and developed the frontend for a solar products distribution company. Built a responsive, multi-section landing page covering hero, product brands (HYKON, HPL, KEI), testimonials, and a marquee CTA - translated directly from custom design to clean HTML/CSS.

Pezzi Automotive | HTML5, CSS3, JavaScript, Bootstrap | [Website Link](#)

Designed and developed the frontend for Pezzi, the automotive division of the Damaso Group - a UAE-based supplier of heavy equipment and vehicle spare parts. Focused on a professional B2B aesthetic suited to MENA and Africa markets.

Koyenco Group | HTML5, CSS3, JavaScript, Bootstrap | [Website Link](#)

Designed and built the frontend for Koyenco, a diversified conglomerate spanning chemicals, automotive, real estate, mining, and retail. Handled both the visual identity translation in Figma and the responsive frontend implementation.

Bytepurse E-Commerce | Node.js, Express, MongoDB, EJS, HTML5, CSS3 | github.com/mhdsaheer/Bytepurse-Ecommerce

A full-stack e-commerce platform for a wallets and bags brand. Custom storefront on the front end, and a Node.js/Express backend with MongoDB, clean MVC architecture, middleware-protected routes, and an admin panel for managing products and orders. Built across 33 commits - this is the most complete project in the portfolio.

Hava Vinyl Store | React, JavaScript, CSS Animations | github.com/mhdsaheer/Hava-Vinyl-Store

A vinyl record store built in React. The focus was on feel - smooth transitions, custom animations, and a layout that holds up on any screen.

Netflix Clone | React, useContext API, CSS | github.com/mhdsaheer/Netflix-Clone

Netflix UI rebuilt from scratch in React. Used the useContext API for state management - solid exercise in component architecture, dynamic rendering, and responsive layouts.

User Auth Web App | React, Node.js, MongoDB, Express, JWT | github.com/mhdsaheer/User-Auth-Web-App

Full MERN stack app with JWT authentication, user profile management, and a role-based admin dashboard. Front end, back end, database - the whole thing.

User Management System | Node.js, Express, MongoDB, EJS, MVC | github.com/mhdsaheer/User-Management-System

Server-rendered Node.js and Express app built on a clean MVC structure. Includes login/signup, middleware-protected routes, and a working admin panel for user management.

Decshop - Furniture Store | HTML5, CSS3 | github.com/mhdsaheer/Decshop

Multi-page furniture store with product, blog, contact, and account pages. Clean layout, consistent design, and semantic HTML all the way through.

CORE COMPETENCIES

• Responsive Web Development • Component-Based Architecture (React) • UI/UX Design & Prototyping • CMS Integration (Strapi) • Brand Identity Design • Cross-Browser Compatibility • Performance Optimization • Agile Team Collaboration • Git Version Control
